

# Accounts TypeDefinitions

## Type definitions

TransferResponse			
Transfer operation response			
Field name	Type	Required	Description
transactionId	String		The id of the transfer transaction that will be used in tracking the transfers between the wallets

ApplicationSubscription			
Application subscription details			
Field name	Type	Required	Description
subscriptionToken	String		Application key identifier
expiryDateTime	Date		Subscription Expiry date
expiredDateTime	Date		Subscription Expired date
createdDateTime	Date		Subscription Create date
activationDateTime	Date		Subscription Activation date
cancellationDateTime	Date		Subscription Cancelled date
subscriptionStatus	<a href="#">SubscriptionStatus</a>		Subscription status
clientReference	String		Client reference
vendorClientId	String		Vendor client Id

## Subscription History

Application subscription history details

Field name	Type	Required	Description
subscriptionToken	String		Application key identifier
expiryDateTime	Date		Subscription Expiry date
expiredDateTime	Date		Subscription Expired date
createdDateTime	Date		Subscription Create date
activationDateTime	Date		Subscription Activation date
cancellationDateTime	Date		Subscription Cancelled date
subscriptionStatus	SubscriptionStatus		Subscription status
clientReference	String		Client reference

## AccountSubscription

Application subscription details

Field name	Type	Required	Description
subscriptionTokens	List< SubscriptionTokenInfo >		List of subscription token details
applicationName	String		Application name
applicationVersionId	String		Application version Id

## SubscriptionTokenInfo

Subscription token information

Field name	Type	Required	Description
subscriptionToken	String		Subscription token
activatedDateTime	Date		Subscription Activated date
expiryDateTime	Date		Subscription Expiry date
expiredDateTime	Date		Subscription Expired date
cancellationDateTime	Date		Subscription Cancelled date
subscriptionStatus	SubscriptionStatus		Subscription status

### DeveloperApp
